\* Entrepreneurship Program

Stoneridge Preparatory School's long-term goal is to help our students be adaptive and successful in the global environment and society. Entrepreneurship skill sets are critically important for students no matter what career path they choose and should be cultivated at youth. Stoneridge provides a well-established support system for inspiring young entrepreneurs to develop creative and innovative ideas. Program staff members will incorporate entrepreneurship elements into coursework, activities, and internship experiences. Students will be given an opportunity to work on projects individually or as a team to start their business journey. The school has strong partnerships with top universities, fortune 500 companies, venture capitalists, and accelerators to facilitate student's learning progress.

### \*Global Program

Global vision is a growing topic among top schools around the world. Stoneridge Preparatory School is dedicated to connecting with global educators, institutes, and organizations to provide our students with opportunities to study and travel abroad. The program is typically set up for summer and winter breaks. The application starts every school year in February and September. Our students have explored Europe, Asia, and other continents that engages in various cultures, history, and technology. They usually travel in a class size of 15 to 20 students depending on the program specifics. The local hosts and Stoneridge staff work closely to ensure the experience is safe and educational. We hope Stoneridge students can carry on their experiences from other countries to cultivate global citizenship spirits.

### \*College Counselling

At Stoneridge Preparatory School, students work with College Counselors at the start of freshman. Our college counseling experts recognize each student's strengths and goals early and walk through the whole process until the end. The college planning and application is a long journey that requires our counselors to work closely with students and families to provide support, information, and professional guidance. Because all of our college counselors have been in the field for several years, it's unnecessary to work with additional counselors. Our students need to find a school that fits them the best rather than looking for a best-ranked school.

### \*Mentor Support - Psychological counseling, Meditation, and Self-awareness

Stoneridge Preparatory School considers students' well-being as the priority. Our school provides periodical mentor meetings to ensure our students are learning in a positive and safe environment. The school believes that mentally healthy and academically strong students tend to be happy and successful individuals.

### Tutoring

Students struggling with any subject-specific and study skills will be required to attend individual tutoring sessions at Stoneridge Preparatory School. Even though Stoneridge Preparatory School does not offer English as a Second Language course, the school does offer one-on-one or small group tutoring sessions for its international students. All tutoring financial arrangements will be sent to the family directly.
